- Security testing, such as SQL injection
- API testing
- Mobile application testing

3. Test Environment

Field	Description
Browser	Chrome, Safari
OS	Windows / Mac
Test Site	Sauce Labs Demo
Test Data	Valid and invalid usernames/passwords

Username:

- standard_user
- locked_out_user
- test123

Password:

- secret_sauce
- test123

4. Test Types

- Functional Testing
- Negative Testing
- Boundary / Edge Case Testing

5. Test Scenarios

- Valid login test
- Invalid username test
- Invalid password test
- Locked user login test
- Empty username and password test
- Empty password test
- Empty username test

- Case sensitivity test
- Space character test

6. Test Data

Valid User Credentials

Field	Value
Username	standard_user
Password	secret_sauce

Locked User Credentials

Field	Value
Username	locked_out_user
Password	secret_sauce

Invalid Credentials Set

Field	Value
Username	test123
Password	test123

7. Entry Criteria

- The website must be accessible.
- Test users must be ready.
- The browser must be working properly.

8. Exit Criteria

- All test scenarios must be executed.
- No critical bugs should remain open.
- The test report must be prepared.

9. Risks

- The website may be down.
- The login system may change.
- Test users may not work properly.

10. Deliverables

- Test Plan
- Test Cases
- Bug Reports
- Test Execution Report
